DIY Photo Balloons

www.dingword.com

Summary

DIY balloons are perfect for parties, wedding banquets, special events, promotions, or even greeting & invitation cards, etc.. Are DIY balloons difficult to make? No! Now, you can print whatever you want on our DIY balloons with simply an inkjet printer at home or in the office! Made of aluminum foil composite film, the DIY balloons will stay good looking and high quality even after a long period of time.

Personalized, easy to make promo gift items. No Heat Press required! Print these balloons in any inkjet printer using standard inks. These balloons come in a frame that allows it to pass through your printer so you can print directly onto both sides of the balloon.

Blow them up through colorful jumbo plastic straws. Helium is not needed. They fit onto bases or our attractive display stand.

Template software is available with a huge selection of designs, or make your own. Insert your photos easily and personalize them "on the spot" for walk in clients. Great for fairs, events, fundraising, shops or parties.

How to play

1. Open the SOFTWARE

2. Select the shape of balloon Insert your personal photo And choose a suitable border or Just write messages.

3.Put one sheet of photo paper with blowing side up into your inkjet printer Start first side printing; the same process should be done for the 2nd side.

4. Press the printed balloon with One hand and tear off it carefully With the second hand following The dot line.

5.Insert transparent air tube into printed balloon. Make sure that the longer part is Inserted into the blowing entrance.

6. Add a 2-part tray to your fixed transparent air tube.

7. Add a supporting stick. Blow your personal balloon With the help of the supported Stick.
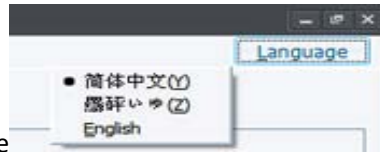

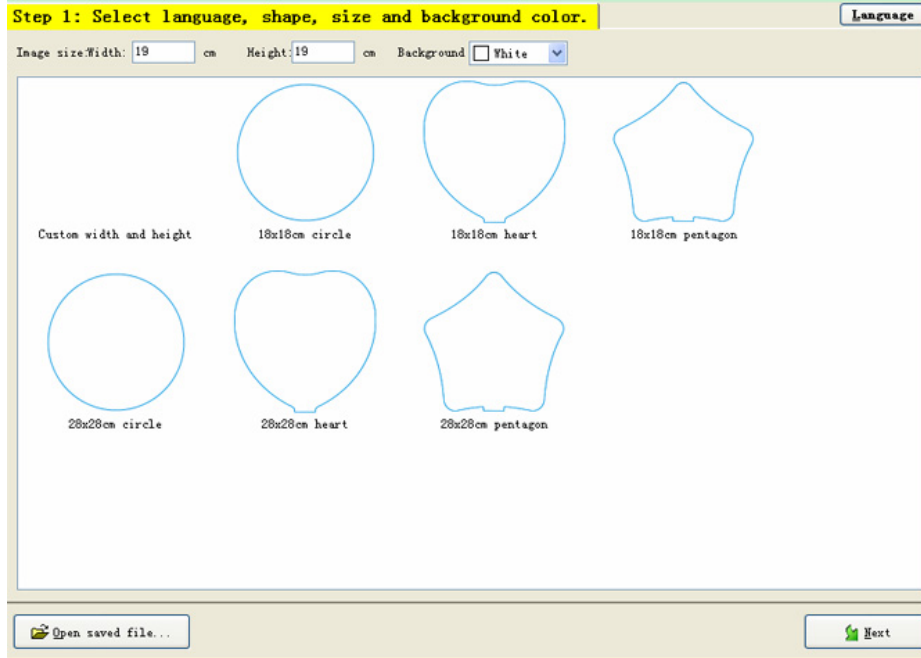

8.Get your unique balloon.

How to use the software

### 1. Select language, shape, size and background color.

Start DIY Magical Color Printing Balloon maker and you will see the first operation interface (as the picture below).

On the top right corner, you will see , choose the language you like

For the first step, you can view some of the templates we have offered. You can select the templates from the list and set the background colors through the "background color" button above the template lists

### 2. Insert frame, image and click next

Notes on guides: in step 2, you can see two borderlines:

1>.**outer borderline**: only the image within the outer borderline will be printed. The image exceeding the outer borderline will not be printed during printing.

2>.**Inner borderline:** please keep the focus or the theme design within the inner borderline in order to achieve optimal image effect
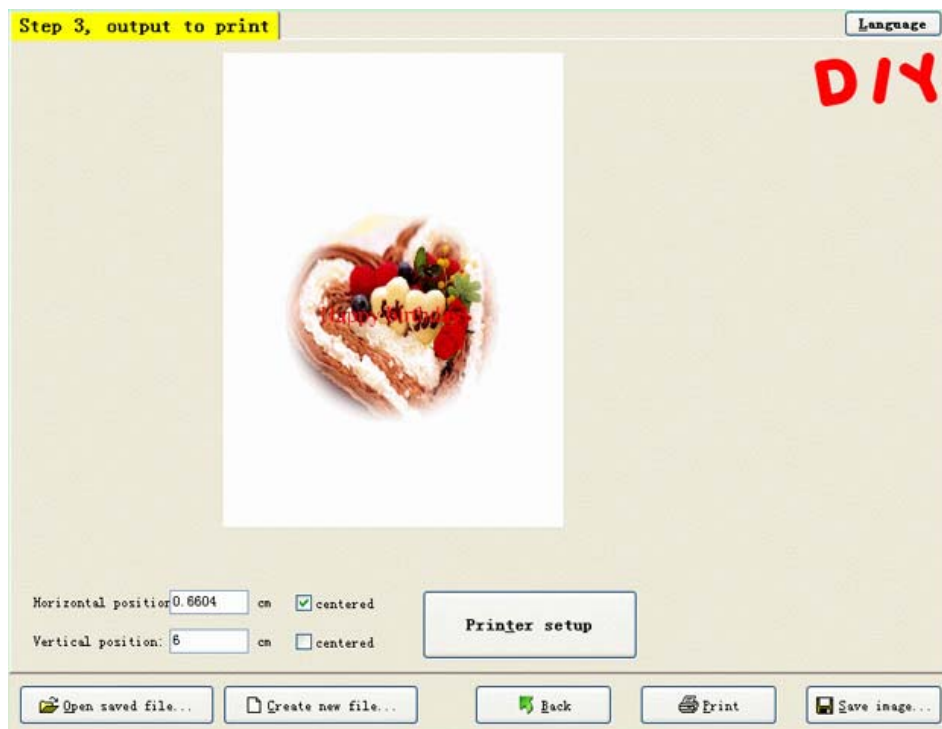

Note: Borderlines will not be printed during printing.

Insert image: click "Insert image" [Insert image...] button and you can insert a picture from the drives in your computer into the current image, or select a pre-designed photo frame into the image. Multiple images can be inserted. The inserted image will automatically center.

Insert Text: You can insert text into the image by clicking "Insert Text" button [T Insert text...] .The inserted text will be automatically selected and centered in the image.

After editing the image, click the Next Button to step 3

3. Output to print

In step 3, first save the designed picture for future re-edit and output the image to the printer. Better printing results can be achieved by setting the printer to "Photo paper print" and "photo quality" in "printing quality".
